OPENING AT SHARP ADVANCE

Market Eased Off on Realizing But Rallied and Close is Very Steady.

(Special to The Times-Dispatch.) NEW YORK, Dec. 2.—Great activity and excitement had been expected at he opening of the cotton market this morning, owing to the Census Bureau refloor of the Exchange where brokers were their wild rush to buy or sell, surpassthe spectacular days of the old July cor-

Trading has been extraordinarily active all the season and perhaps nover before has there been so large a speculative interest in the market, all standing to who of lose on the report of the Census Bureau. "The opening was an advance of 13: to 15: points and the first influence o ocvering carried March to within 3 points of the 12 cent mark, that mouth selling at 11.97, while December reached 11.69, January 11.80, and May 11.34. Realizing was extremely heavy, however, and as the domand from shorts grow somewhat less persistent moderate reactions were scored, though the undertone never lost its strength or excitement. The Liverped market, which had been rather lower than due folned in the general strength and New Orleans was quite as active and excited as the local market. Trading has been extraordinarily active

than due joined in the general strength and New Orleans was quite as active and excited as the local market.

MARKET BASED OFF.

By neon the market had eased off under continued realizing until January was quoted at 11.75. March at 11.87. May at 11.85. The Census Bureau report fell absolutely flat, the first sales after the report being practically unchanged. Afterward the market broke to 11.71 for January and March and to 11.70 for May and July, but this decline attracted further active built support and covering and soof the market had railled to about the level occupied just before the report.

During the remainder of the afternoon the market was rather less active and prices ruled more or loss fregular, but generally speaking, the market was firm and a little ever last hight's finals on covering and built support based apparently on the theory that the bureau report of to-morrow would estimate the crop at low figures. The close was very residy, net unchanged to 6 points higher. Sales were estimated at 1200,000.
